In the battle against breast cancer, early detection is a woman's most powerful weapon. In fact, according to the National Cancer Institute, when breast cancer is detected in an early, localized stage, the five-year survival rate is 98 percent. That's why it is so important for all women to make breast health awareness a regular part of their healthcare routine.

National Breast Cancer Awareness Month

Find out what your risk factors are for breast cancer and schedule a mammogram. Early detection is key. The sooner the disease is caught, the easier it can be treated and the higher the survival rate.
